

aiga

Your AI solution for

the fast, accurate creation of multilingual
glossaries in the industrial sector.

The Challenge

Why aiga ? ▶▶

The Problem

Creating high-quality glossaries has traditionally been **time-consuming** and **costly**. Glossaries, tables, and Q&A elements—often in multiple languages—are crucial ranking factors in SEO, yet they require an enormous amount of manual effort.

The Solution

With aiga, you can create a complete, search engine-optimized glossary in **just a few days**—**precise, multilingual**, and **tailored** to your industry.

SEO Ranking Factors

User experience, content quality, and **E-E-A-T** (Experience, Expertise, Authoritativeness, Trustworthiness) are crucial for your visibility.

E-E-A-T

Getting Started (Step 1) ▶▶

 **Pro Tip:** Clearly define your categories for optimal results. The more precise the prompt, the better the outcome.

Example Prompt

Prompt Structure

For a Wikipedia-style glossary in the ABC field:

Create the entry for `{{term}}` using the following structure:

- Definition
- Occurrence & Application
- Relevance in Theory and Practice
- Examples, Synonyms, Related Terms
- Additional Information
- Links (including your own website)
- Optional: Charts, Images, Study References

Tone & Style

Factual and precise, Wikipedia-style. No introductions or thank-you notes—deliver only the finished content.

Structural Elements

- 1 Definition & Basics
- 2 Practical Application
- 3 Theoretical Relevance
- 4 Related Terms
- 5 Historical Context
- 6 Sources & References

 The placeholder `{{term}}` is automatically replaced with each term from your list.

LLM Advantage

Parallel Processing

Multiple LLMs work in parallel to optimize the **completeness** of generated content.

Excel Export

Results and sources are exported directly to **Excel** for easy further processing.

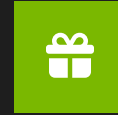

Validation

Sources significantly simplify **fact-checking** and quality assurance.

Automatic Consolidation

All LLM outputs are merged into a **final, optimized response**.

Extras Included

 Meta Title

 Meta Description

 llms.txt

 Schema.org

Supported LLMs: ChatGPT, Claude, Gemini, DeepL, and more

Global

Multilingual Made Easy

Automatic Translation

Available in **multiple languages**—fully automated and consistent. Your glossary reaches a global audience with no extra effort.

Quality Control

Final **proofreading** before going live is recommended to ensure the highest quality.

Smart LLM Selection

Choose the appropriate LLM (e.g., **ChatGPT**, **DeepL**) for each target language to ensure optimal translation quality.

Professional Text Optimization

Especially suitable for **expert content**—technical terms and industry jargon are translated accurately.

Deutsch
