aiga

**Your AI solution for the fast, accurate
creation of multilingual glossaries in the
industrial sector.**

effective

Why aiga?

Maximize visibility, quality, and user trust

- User experience, content quality, and E-E-A-T (Experience, Expertise, Authoritativeness, Trustworthiness) are decisive SEO ranking factors
- Glossaries, tables, and Q&A elements play an important role in ranking, especially in multiple languages

Challenge

- Until now, creating high-quality glossaries was time-consuming and cost-intensive

The Solution

- With aiga, you can create a complete, search-engine-optimized glossary in just a few days that is technically precise, multilingual, and tailored to your industry

effective

Your Benefits with aiga

Category	Description	Your Benefit
AI Readability	“LLMs love glossaries”	Visible ranking improvement
Time & Costs	Automated creation & translation	Up to 75% savings in time and costs
Content Completeness	Combination of multiple LLMs for best results	Comprehensive, reliable content
Accuracy	Citations for fact-checking	Trustworthy, authoritative content

Enter your prompt template here. Use {{term}} to insert terms.

Use {{term}} as a placeholder where you want each term to be substituted.

Terms (one per line)

2

Enter your terms here, one per line.

Select Models

3

☐ o4-mini ☐ o3-mini ☐ gpt-4.1 ☐ gpt-4o ☐ perplexity-base ☐ perplexity-pro ☐ perplexity-reasoning ☐ google-ai-overview

Run Comparison

4

- 1 Enter a prompt (per category/area)
- 2 Enter all terms (per category/area)
- 3 Select LLMs
- 4 Start

effective

Example Prompt

- “For a Wikipedia-style glossary in the field ABC: create the entry for {{term}} with the following structure:
 - **Definition**
 - **Occurrence & application**
 - **Relevance** in theory and practice
 - **Examples**, synonyms, related terms
 - **Additional information** (historical development, other fields of application)
 - **Links** (including own website)
 - **Optional**: charts, images, references
 - **Tone & Style**: Factual, precise, structured – like in Wikipedia.
 - No introductions or courtesy notes. Delivers the finished content in an exportable format.

effective

Added Value through LLM Combination

- Multiple LLMs in parallel
- Export results and sources to Excel
- Citations facilitate fact checking
- Automatic consolidation into a single, optimal answer
- Extras:
 - Meta-title, meta-description generation
 - llms.txt
 - Schema.org data

effective

Multilingualism Made Easy

- Available in many languages
- Selection of the appropriate LLM (e.g., ChatGPT, DeepL) depending on the target language
- Final proofreading recommended before going live
- Particularly suitable for professional technical texts

effective

Process Overview

Step	Who	Time Required
